SUMMARY

After taking a few web development courses and absolutely loving them, I decided pursue a career change to that of a software developer. I wanted to attend a boot camp that had a great reputation for their curriculum and for helping their students transition to new careers as software developers and Turing encompassed all of that. I am looking forward to starting my new career as a Junior Software Developer.

CORE SKILLS

Languages	Technologies	UI	Frameworks
JavaScript	HTML5	Sketch up	Node.js
JSON	CSS/CSS3	Moqups	React/Redux
	Webpack	Bootstrap 3	
	Git/GitHub		

PROJECTS

Static Comp 1

HeadCount2.0
 HeadCount 2.0 was a paired project. This project incorporated React, HTML5, CSS, JavaScript, JSON, and TDD. My partner and I utilized mock api data to display educational stats per district in Colorado. Testing was done with Enzyme and Jest. The app is responsive on phones, tablets, and desktop computers.

Swapi Box
This project used the Star Wars api to create a display of cards similar to that of a Trello board that would load with specified data from the api. We used React with this project

EXPERIENCE

Kelly Educational Staffing
August 2017 – present – Substitute teacher/para professional
I work as a substitute teacher/para professional both public and public charter schools in Denver and Aurora Colorado. I Teach lesson plans as outlined by instructions left by the permanent teacher. I assist teachers with grading papers and other duties as needed.

Turing School of Software Design Coding Bootcamp
Jan 2017 – July 2017 -Student
I attended Turing School of software design as a boot camp student. I have used HTML5, CSS3, JavaScript, and react to build various projects. We created personas to create in class projects using ui/ux concepts around our personas. I have collaborated with many students on paired projects, and have been able to grasp the concepts and apply them to the required projects.

CH2M Hill
June 2016-Sept 2016 UI/UX Web Development Intern - *Application Modernization Team*
Assisted in migrating 67 internal .NET aspx websites to the new MVC design pattern using HTML5, CSS, JavaScript, and jQuery. This project was essential in streamlining and modernizing CH2M Hill's internal web services. Exposure to C#.

Colorado State University
Oct 2014-Feb 2017 Front-End Web Coordinator, CASA Department,
Maintained existing websites and applications using HTML5, CSS3, JavaScript, JQuery, assisted in building new websites. Utilized C# to create an expense tracking document for the finance department.
